Defining excellence since..... 1986

Ever since we opened our doors for business almost three decades ago, we have been committed to excellence in all we do, to give customers an unparalleled insurance experience.

We believe excellence is an unending journey, not a destination, nothing but great suffices and great is a moving target.

We lead with strength, differentiate ourselves on excellence and surprise you with our refreshing personal touch. By honoring our history and carefully planning our future, we are dedicated to continue defining the standard of excellence in the insurance industry.

MOHAMMED SHOEB
Chairman

Chairman's Message

Bismillahir Rahmanir Rahim

AssalamuAlaikum

Dear Shareholders,

On behalf of the Board of Directors of Phoenix Insurance Co. Ltd. and on my own behalf I heartily welcome you all to this 31st Annual General Meeting of Phoenix Insurance Company Limited. I am really grateful to the Almighty Allah for being able to present before you a brief report about the performance of the Company in 2016.

With the support of the valued stakeholders, the prudent guidance of the members of the Board of Directors and vital role of the capable management team, your company has been able to reach an excellent growth and success in the year 2016.

DELIVERING THE PERFORMANCE OF 2016

Despite of stiff market competition, performance of the Phoenix Insurance during 2016 was praise worthy. The Gross Premium Income stood at Tk.652.18 million and underwriting Profit stood at Tk.77.10 million and the net profit was at Tk.126.15 million. The reserve fund build up to Tk.529,741,011/- registering 6% growth over the last year's position. The Investment of the company stood at Tk.597,678,947/- whereas last year it was Tk.475,573,458/- only. So, all these are seems to be encouraging financial indication for the company.

DELIVERING THE BENEFIT OF THE SHAREHOLDERS

You know that business procurement cost is very high comparing previous years as result it is become tough to maintain the services of the insured. We took positive steps towards reducing costs across the business and improving our operating efficiency. Within other areas of our strategy, such as pricing and claims, we continued to deliver sustainable benefits for our customers and shareholders.

Phoenix Insurance Company Ltd. is well aware about interest of the stakeholders and the

Board's desire is to keep it up. After managing the overall expenses of the company it was very tough to maintain the steady growth of the company. However, we are proposing 15% Cash dividend for the year ended 2016, which is highly appreciable declaration for the valued shareholders.

DELIVERING VALUE FOR OUR CUSTOMERS

Our focus on improving our pricing capability and claims infrastructure has particularly helped us to reduce prices for our customers. In addition, we have been exploring new ways in which we can innovate to achieve better outcomes for customers. We are on the cusp of a new era, when growing customer use of new technologies prompts them to seek a different experience from their insurer, and where nimble providers can harness technology to offer both competitive products and more personalized solutions. The strength of our data and brands, together with the operational and financial transformation of our platform, leaves us well placed to help draw the road map for this new age. We have also been working hard to reduce customer complaints. This is a key area of focus for us. To ensure we are tracking how well we are responding to our customers' needs.

We recognize that, while we have made improvements in how we interact with our customers,

Mohammed Shoeb, Chairman

we have not met all of our aspirations to develop and differentiate our customer propositions and brands. We have much to do to meet the evolving needs of our customers, but we are rising to the challenge with determination and energy.

DELIVERING FOR OUR PEOPLE

Peoples continue to be the main driver behind delivering better outcomes for our customers, to ensure our organization can operate in the most cost-efficient manner, our consistent aim has been to treat colleagues with the utmost fairness and respect throughout redeployment or redundancy processes. As we continue to drive an agenda of operational and cultural change through the organization, we remain committed to investing in our people, which in turn will help us to deliver the products and services that our customers value.

STRATEGIC PRIORITIES FOR 2016

During 2016 we aim to progress further towards delivering the remainder of the strategic financial targets we have set ourselves. We will also continue to enhance our products and update our infrastructure to ensure we sharpen our customer experience, delivering what the customer has grown to expect, and doing so sustainably for all of our stakeholders, be they our customers, our people or our shareholders.

DELIVERING THE THANKS TO OUR PATRONS AND SUPPORTERS

I would like to take this opportunity to express my sincere thanks and gratitude to the Govt. of Peoples Republic of Bangladesh, Insurance Development & Regulatory Authority, Bangladesh Securities and Exchange Commission, our local and overseas reputed Re-insurers, all Regulatory Bodies, Shareholders, Patrons, Valued Clients, Bangladesh Insurance Association, Bangladesh Insurance Academy and members of the Board for their kind cooperation extended to us throughout the year.

A very special thanks to the management and all our employees whose untiring efforts have helped us in achieving our goal.

Chief Executive Officer Message

— Md. Jamirul Islam, Chief Executive Officer

Dear Shareholders,

Assalamualikum.

I would like to take this opportunity to convey my heartfelt thanks for the unstinted support of our customers, business partners and above all employees for their collaboration and confidence in our organization. The year ahead unfolds new challenges and avenues to explore which we are looking forward to embrace as the trusted partner of choice. It has been a financially challenging year for achieving the business as well as minimizes the business procurement cost of the company. Business management cost is increasing due to various reasons which have affected the earning of the company.

We have come a long way in the last 31 years and grown in scale, overcome challenges, brought in unique offerings, have been accredited for innovations that paved the way for reforms in the company and have won numerous accolades. However, few things remain constant—our obsession with delivering superior customer value, ensuring growth with profitability for a sustainable future and being the best employer in the company.

2016 was a year where we scaled our operations, our strategic investments bore fruit and digitalization offered us newer opportunities and frequent touch points that enabled us to tailor our offerings for our customers and reach out to untapped markets. We also diversified our portfolio with a great emphasis on investment income and insurance business income. Most importantly we once again emerged as one of the most financially robust insurers in the industry with a profit ratio of 20% despite paying gross claims worth Tk. 8,16,09,809/- due to the loss of the insurer. Some of our key performance indicators for the year under review are:

1. The Gross Written Premium is Tk. 65,21,77,275/-.
2. The company continues to be one of the most profitable insurers in the industry with a Profit after Tax of Tk.9,84,88,900/-.
3. The Management expenses ratio is 38.72% for our prudent underwriting model and risk based pricing.
4. The company maintained its credit rating is AA- awarded by CRISL for the year-2016, which signifies the good claims paying ability.
5. During the year, our company was awarded by ICMA and BANK BIMA AURTHANITY for the excellent presentation of the annual report of 2015.

Technology and digitalization continue to be instrumental in changing the way of the industry functions with all the players in the ecosystem working towards digitization not only the processes or distribution networks, but also aspects like product and service offerings. What remains a major challenge is the price war that continues to have an adverse impact on the industry's profitability and combined ratio.

Our commitment to our customers and employees remains and we shall ensure that we keep on pushing our boundaries to take it to the next level. We also believe that feedback is important to improve our service and we will be happy to listen to you and you can suggest areas of improvement. My mission is to reach the goal of the company as early as possible and I am trying to maintain the close engagement with all to enrich our potential. We all try our best to keep up our sustainable growth in the days to come.

I would like to express my sincere thanks and profound gratitude to stakeholders, our valued shareholders, clients, all regulatory bodies including the Insurance Development & Regulatory Authority (IDRA), Local & abroad Reinsurers, Bangladesh Insurance Association, Bangladesh Insurance Academy, Bankers and the team of Phoenix family and the Chairman along with his honorable board of Directors who have contributed immensely in achieving the goal of the Company.

Thank you all.

The system is designed to manage rather than eliminate the risk of failure to achieve business objectives. Accordingly, it can only provide reasonable and not absolute assurance against material misstatement or loss. The risk management and control processes are implemented by the Management, led by the Managing Director and Senior Management of the Company, who collectively is responsible for good business practices and governance.

MANAGEMENT RESPONSIBILITY

The Management is responsible for implementing the framework, policies and procedures on risk and internal control approved by the Board. The Risk Management Committee/ MANCOM continues to play a pivotal role in overseeing the implementation of the risk management framework, periodically reviewing the risk management processes and ensuring that on-going measures taken were adequate to manage, address or mitigate the identified risks and reporting the status to the Audit Committee.

RISK MANAGEMENT

The Board confirms that as an integral part of the system of internal control, there is an ongoing group-wide risk management process for identifying, evaluating and managing the significant risks faced by the company. Risk management is practiced within the company on an interactive basis.

Management from each business or department applies a risk/control self-assessment approach to identify the risks relating to their areas of supervision and control. These include the likelihood of these risks occurring; the consequences if they do occur and the actions being and/or to be taken to manage these risks to an acceptable level. The risk profiles and risk treatment measures determined from this process are documented in risk registers with each business or operations area having its respective risk register. The overall process is facilitated by the company's risk management department which is dedicated to the role of the company and regulatory authority

The Board is satisfied with the adequacy and effectiveness of the Company's risk management and internal control system. The Board has received assurance from the CEO and CFO that the Company's risk management and internal control system, in all material aspects, is operating adequately and effectively. For the financial year under review, there were no material control failures or adverse compliance events that have directly resulted in any material loss to the Company.

Risk is a multi-dimensional phenomenon and a constant feature of everyday life. Fires, accidents, thefts, explosions, natural calamities and terrorism are the more common types of risk the community faces.

The dimensions and effects of such loss events have since long assumed major significance for whole economies. The question of how to predict and prevent such risks is accordingly the subject of intensive discussion both in the political sphere and among the public at large.

Company's Risk Assessment & Management

The complex realities of modern economic life and the growing awareness of the public at large place increasing demand on companies to pursue appropriate and far-sighted policies about risk. The same applies to insurers in determining their underwriting policies. The rapid development of new technologies and the changing nature of production processes necessitate a constant analysis of risk profiles. Both entrepreneurs and insurers therefore face enormously increased need for analytical and advisory services.

PICL works closely with clients to identify various risk exposures and then provide specific insurance proposals. This helps in loss prevention and reducing the cost of protection.

Our market-driven team of inspired and technically qualified insurance personnel, comprises specialists in civil and mechanical engineering, metallurgy, electronics, and other disciplines. They are on call for necessary professional advice at all times. Our linkages with overseas specialists are of major value to our clients.

In addition to insurance protection, it is our practice to provide risk reduction advice to clients and assist them in developing preventive capabilities to avert mishaps and disasters.

Risks of Insurance Operations

The insurance business principal is taking and managing the risks. The largest risks pertain to risk selection and pricing, the acquisition of reinsurance cover, and the adequacy of technical provisions. Within General Insurance, the risk inherent in technical provisions lies mainly in insurance lines characterized by a long claims settlement period. In addition to underwriting risks, a major insurance business risk consists of the investment risk related to the assets covering technical provisions.

Risk Management Plan

The management of Phoenix Insurance coordinated to set the activities and methods that are used to an organization and to control the many risks that can affect its ability to achieve the objectives. The management makes the plan that is used to manage the risk. The Company's risk management plan is the management of components, the approach, and the resources that will be used to manage the risk. Typical management components include procedures, practices, responsibilities, and activities (including their sequence and timing). The Company's risk management plans applied to products, processes, or to an entire company or to any part of it.

Risk Concentrations

The Phoenix Insurance Company takes the risk concentration in EML (Estimated Maximum Loss) estimates for property risks and through EML break through cover included in reinsurance cover. Our operating region has no major risk of earthquakes. With respect to risks associated with other natural disasters, such as storms and floods. However, the company has protected against catastrophe accumulation losses through an extensive catastrophe reinsurance cover whose size has been dimensioned to correspond to the calculated size of a catastrophe loss occurring once every 200 years. The catastrophe accumulation cover applies to property damage and personal injuries.

Risk Analysis

Risk analysis is a process that is used to understand the nature, sources, and causes of the risks that we have identified and to estimate the level of risk. It is also used to study impacts and consequences and to examine the controls that currently exist. The Management of Phoenix Insurance always aware of the probability of the Insurable items risk factors. Before issuing any Insurance policy the concerned employee consult with the underwriting departments about the risk involvement of the insured items. If it is found reasonable and capable for the company and also have facility of reinsurance then with the consent of the Managing Director the concerned authority issued the policy for taking the risk.

Underwriting Risks

By taking out an insurance policy, the policyholder transfers his insurance risk to the insurer. The underwriting risk associated with an individual general insurance contract. Our Company's portfolio comprises a very large number of general insurance contracts. Because of this large size of the insurance portfolio, the expected number of claims is also great. An accumulation of loss due to natural catastrophes or large catastrophes caused by human activity constitutes a specific risk type. In such a case, one catastrophic event may in practice give rise to simultaneously payable claims for a large number of insured risks at high amounts. The resulting total claims expenditure may be extremely large. However, this risk can be diversified, since the company operates in the region with a perceived relatively low risk of natural catastrophes, enabling the company to protect against the risk through reinsurance.

Underwriting Risk Management

The most important tasks within underwriting risk management relate to risk selection and pricing, the acquisition of reinsurance cover, the monitoring of claims expenditure and the analysis of technical provisions. The Underwriting Executives act as the highest decision-making body with the support of Managing Director to takes the underwriting risks. The Underwriting Executives make underwriting decisions within the framework of powers confirmed by the Management/Boards of Directors of the company, and report its decisions to the Board.

The risks cost are made according to the Underwriting Guidelines governing each line of insurance in case the risk involved is below the amount set for the Underwriting Executives. Greater and more severe risks require decisions made jointly by senior underwriters or managers. For basic insurance lines, decisions are made on a system-supported basis and customers and the objects of insurance are selected within the powers allowed by instructions specifically approved.

Risk Selection and Pricing

Operating models highlight the role or risk selection and pricing. The company has set limits for the size and extent of risk for each insurance line and risk concentration. The company has a centralized the data in

Company's Risk Assessment & Management

the head office and analysis the applications in place to support of the risk selection and pricing. Insurance terms and conditions serve as a vital tool in mitigating risks. In addition, risk analyses are performed on a customer or insurance line specific basis to mitigate risks.

Reinsurance Risk

The Board of Directors annually approves the reinsurance principles and the maximum risk per claim retained for own account. In practice, this risk is kept lower if this is justifiable considering the price of reinsurance. Retention in risk-specific reinsurance is a maximum of BDT.1,50,00,000/- for Fire loss, BDT.65,00,000/- for Marine Cargo, BDT.25,00,000/- for Misce & Engineering, and BDT. 7,50,000/- for Motor insurance and that in catastrophe reinsurance BDT.50,00,000/-. The capacity of risk plus cat reinsurance covering loss accumulation stood at BDT. 2,00,00,000/- in 2016. In addition, claims under the business have an annual aggregate protection with a capacity of BDT 2,50,00,000/-.

The level of reinsurance protection has an impact on the need of solvency capital. Only companies with a sufficiently high insurance financial strength rating are accepted as reinsurers. Moreover, maximum limits have been confirmed for the amounts of risk that can be ceded to any one reinsurer. These limits depend on the nature of the risk involved and on the company's solvency. The Phoenix Insurance Company has mainly placed its reinsurance agreements with the companies with at least 'A' rating affirmed by Trust Re Bahrain, Malaysian Re and Asian Re-insurance Corporation in Bangkok.

Comprehensive Motor Insurance Risk

Comprehensive insurance policies cover the loss or damage to insured motor vehicles. The comprehensive insurance portfolio consist mainly motor vehicle policies taken out by private individuals and companies. The rating of motor vehicle insurance employs a no-claims bonus system, under which the occurrence of a loss event raises the premium. In addition, the insurance company has the right to alter the premium annually. The majority of the motor vehicle insurance portfolio comprises private individuals' policies. In other respects, the insurance risk in this class consists mainly the insurance taken out by companies. The Phoenix Insurance has reinsurance protection with retention of BDT.7,50,000/- only for comprehensive Motor Insurance loss.

Risk of Cargo Insurance

Cargo insurance applies mainly to companies' transport risks, covering loss of or damage to goods in transit. This line of insurance also contains luggage and boat/yacht insurance whose policyholder is mainly a private individual. In addition, weather conditions may involve accumulation risks covering a geographically large region, such as storms and floods, and the risk of snow and icy roads during the winter pertains to comprehensive insurance.

The Phoenix Insurance Company has taken out reinsurance cover against major loss of or damage to cargoes, with the retention under reinsurance amounting to BDT.65,00,000/-.

Market Risk

Instability and disruption of overall economies of local and abroad can expose the company's business income including the financial and capital markets position and also changes the annual premium income position, which may adversely impact on the company's financial condition. This risk can have a significant effect on investment returns and market values of securities positions, which in turn may affect both the company's results of operations and financial condition.

The Phoenix Insurance Company Limited has trying to reduce the risk of the portfolio by relocation the service of the portfolio and, as a result, profitability would-be increased, unless there is no impact on underwriting returns.

Investment Risks

In insurance business, investments comprise assets covering technical provisions and shareholders' equity. Through controlled investment risks, Phoenix's aims is to achieve the best possible return on the investment portfolio at an acceptable risk level while taking account of the structure of technical provisions and the solvency targets.

In our company, investment operations are based on investment plans and investment authorizations, confirmed by the Board of Directors, which specify the basic allocation and range of investments by asset class, the organization of investment, risk limits as well as decision-making powers and authority. The Company applies the Asset/Liability Management (ALM) model used to determine the basic allocation. As a result of fluctuations in asset values and active investing, the company occasionally deviates from the basic allocation within defined limits.

The Company's Investment operation presented in the monthly Board of Directors Meetings. The Risk Management function monitors daily risk limits set in the investment plan, key risk limits including allocation limits, interest rate, counter party credit-rating limits and diversification limits.

Interest Rate Risk

We know that general insurance have huge amount of liquid investment and the investment kept in the form of FDR. The FDR interest is one of the main incomes of the company. The interest rate of fixed-income portfolios is account for the certain period. If the interest rate is fluctuating or decrease from the previous years then income portfolio may be downward. So, determining the interest rate risk, the company regularly monitors the FDR and if required communicate with the banks for maintaining the fixed rate to confirm the interest income properly.

Legal Compliance Risks

The Company could be subject to risks arising from alleged or actual violations of any of the foregoing, and could also be subject to risks arising from potential employee misconduct, including non-compliance with internal policies and procedures. Substantial legal liability could materially

adversely affect the company's business, financial condition or results of operations or could cause significant reputation damage, which could seriously harm the business of the company.

Cocclusion

The Management of Phoenix Insurance Company Limited has already been taken necessary steps to confirm the regulatory works based on the guidelines of the authority. The Board of Directors regularly motivated the management to maintain the rules and regulation and do the business as prescribed by the IDRA. The Management always aware about the legal compliance and ensured the Risk management to save the company.

Statement of on Going Concern and Liquidity Management

Basic principles of the accounts of the company assumed that the company would continue the business operation in the foreseeable future. The significance of this principle becomes apparent when the value of a running business is compared with the value of one being liquidated.

The moment a business is declared liquidated, all debts become immediately due in full, tangible assets are worth only what they will be sold for in an auction or fire-sale, and the intangible assets (such as goodwill) become worthless. In the financial statements we have presented the position and it is ensured that all reasonable steps have been taken to continuing the company as a going concern and also continuity of business unit principle. Accounts prepared based on the going concern concept to present a realistic financial reports. Without the 'going concern' concept, financial statements would have to write off all assets in the current period including long-term assets that still have an economic benefit for future periods.

As an insurance company, our core business generates liquidity primarily through premium income. Our exposure is to liquidity risk items mainly from two sources: the need to cover potential extreme loss events and regulatory constraints that limit the flow of funds within the company.

The Company maintains an overall asset liquidity profile that exceeds requirements to fund potential liabilities under adverse scenarios. The Company also actively manages and monitors the matching of asset positions against its commitments, together with the diversification and credit quality of its investments against established targets.

The Company's primary source of funds is cash provided by operating activities, including premiums and net investment income. These funds are used primarily to pay claims, commissions, operating expenses and shareholder dividends. Cash flows generated from operating activities are generally invested to support future payment requirements, including the payment of dividends to shareholders.

We have actively managed the liquidity risks to ensure that we can satisfy the financial obligation of the company. Company's most of the amount invested in the form of publicly traded companies' shares and FDRs and also have huge cash balances. The Phoenix Insurance Company Ltd. liquidity stress tests are reviewed regularly and the company's Audit Committee approve their main assumptions in time successfully. The total cash and cash equivalents as at the end of 2016 is Tk.42,72,32,191/- against Tk. 47,20,64,140/- in 2015.

Statement of Opportunities

As a leading insurance company of the country, the Company is in a position to avail and exploit a number of opportunities. Following is the summary of significant opportunities present to the Company:

- Expand general solutions through window operations;
- Increasing reach to all parts of the country through expanding distribution network;
- Develop micro insurance solutions for the socio economic group at the bottom of the pyramid;
- Focus on insurance awareness through continuous investments in communication channels and market education; and
- With increasing mobile penetration amongst the masses, utilize such platforms for customer interaction, awareness, marketing and sales.

Materiality Approach

Management believes materiality as a key component of an effective communication with stakeholders. In general, matters are considered to be material if, individually or in aggregate, they are expected to significantly affect the performance and profitability of the Company.

Directors' Report

For the year ended 31st December 2016

Bismillahir Rahmanir Rahim

Dear Shareholders,

Assalamu Alaikum,

On behalf of the Board of Directors, I am delighted to welcome you all to the 31st Annual General Meeting of the Phoenix Insurance Company Limited and have the pleasure to place before you the Annual Report together with the Audited Accounts of the Company covering the Statement of Financial Position (Balance Sheet), Statement of Comprehensive Income (Profit & Loss Account), Consolidated Insurance Revenue Accounts (Revenue Accounts), the notes thereto and the Auditors' Report for the year ended 31st December 2016.

TREND OF WORLD ECONOMY AND POSITION OF BANGLADESH

Trend Of Global Economy

In 2016, the world economy expanded by just 2.2 per cent, the slowest rate of growth since the Great Recession of 2009. Underpinning the sluggish global economy are the feeble pace of global investment, dwindling world trade growth, flagging productivity growth and high levels of debt. Low commodity prices have exacerbated these factors in many commodity-exporting countries since mid-2014, while conflict and geopolitical tensions continue to weigh on economic prospects in several regions.

World gross product is forecast to expand by 2.7 per cent in 2017 and 2.9 per cent in 2018, with this modest recovery more an indication of economic stabilization than a signal of a robust and sustained revival of global demand. The slight increase in gross domestic product (GDP) growth projected for developed economies in 2017 is largely driven by the end of the destocking cycle in the United States of America and additional policy support in Japan. Economies in transition are expected to expand by 1.4 per cent in 2017, following two consecutive years of decline, as the region has largely absorbed the sharp terms-of-trade shock that several countries suffered in 2014-2015.

World trade volume growth is projected to decrease from 2.6 percent in 2015 to 2.3 percent in 2016 and then increase to 3.8 percent in 2017. Trade balances in advanced economies are expected to deteriorate in 2016 and 2017 since export growth is projected to be weaker than import growth; while those in emerging markets and developing economies are expected to improve in 2016, but deteriorate in 2017. The growth rate of imports for advanced economies is expected to decrease from 4.2 percent in 2015 to 2.4 percent in 2016 and increase to 3.9 percent in 2017. In emerging markets and developing economies, growth rate of imports is projected to increase from negative 0.6 percent in 2015 to 2.3 percent in 2016, and rise further to 4.1 percent in 2017.

Exports of advanced economies are expected to grow by 1.8 percent and 3.5 percent in 2016 and 2017 respectively while those of emerging markets and developing economies are expected to grow by 2.9 percent and 3.6 percent respectively during the same period.

Bangladesh Economy

Bangladesh economy grew by 7.1 percent, exceeding the 7.0 percent growth target and the 6 percent growth trajectory. This strong growth was mainly supported by industry and services sectors. Annual average CPI inflation continued to decline to 5.9 percent in June 2016, below the target of 6.2 percent. The declining trend in average CPI inflation is mainly driven by favorable food inflation.

Bangladesh has experienced high and steady growth for more than a decade, with an average growth of over 6.0 percent. Growth exceeded 7 percent in FY16, a decade high, and higher than the average in peer Asian economies, making Bangladesh the 3rd best growth performer in Asia. Growth accelerated to 7.1 percent in FY16, up from 6.6 percent in FY15, with support from both domestic and external demand. On the supply side, industry and services sectors contributed to the growth.

Export grew by 8.9 percent, while import by 5.5 percent in FY16. Remittances, however, ended up with a negative growth of 3.0 percent during the same period. The current account surplus of USD 3.7 billion led to an overall balance of USD 5.0 billion, building net foreign assets.

Sectorally, industry, services, and agriculture sectors grew by 11.1, 6.3, and 2.8 percent, respectively. Growth decomposition shows that the largest share (3.4 percentage points) came from the industry sector, followed by services (3.3 percentage points) and then agriculture (0.4 percentage points).

According to the Bangladesh Bureau of Statistics (BBS), GDP at current market price was Taka 17328.6 billion for FY16 which was 14.3 percent higher than that of the preceding fiscal year. In FY16, per capita real GDP and GNI were estimated at Taka 55259 and Taka 58442, respectively. Per capita nominal GDP and per capita real GDP grew faster in FY16 than in the previous fiscal year.

Global Insurance Positions

INSURANCE SCENARIO

The global non-life industry generated around USD 2100 billion of premium income in 2016, of which 20% came from emerging markets. Non-life insurance ranges from standardized motor and household insurance to sophisticated tailor-made liability and property covers, including specialty commercial and industrial risk insurance.

Primary non-life premium growth was slower in 2016 than in 2015. Global primary non-life premiums are estimated to have risen by 4% in real terms in 2016, after a 6% increase in 2015.

In mature markets, premium growth decelerated to 1.7% due to weaker economic growth and a softer pricing environment in commercial insurance. The Western European markets exhibited some momentum mainly from stronger motor business in Germany and Spain. The UK and France were stable, but weak. In Italy premium income declined again, albeit at a slower pace than in previous years. Larger markets with accelerating expansion include Canada, Japan and South Korea.

Primary non-life premiums in the emerging markets grew by an estimated 5.3% in 2016, up slightly from 2015, but significantly slower than the 8% annual average growth between 2010 and 2014. The weaker increase was due to continued economic slowdown in Latin America, with inflation-adjusted declines in Brazil, Argentina and Venezuela, sluggish-to-negative growth in the larger markets in Sub-Saharan Africa, and a premium growth slowdown in China (7% vs. 10% in 2015). This was partly offset by recovery in Central and Eastern Europe and strong growth in the Middle East and North Africa.

In terms of underwriting profitability, the US non-life industry's combined ratio worsened from 98% in 2015 to 100% in 2016, driven by higher catastrophe losses — claims from Hurricane Matthew are likely to add to an above average natural catastrophe burden in 2016 — and lower reserve releases. Softening rates in commercial lines contributed to a worsening of results and a decline in premium income in this segment. Underwriting profitability in Europe was about the same in 2016 as in 2015, with an

average combined ratio of around 95%. Underwriting results in Germany and France suffered from severe storms and floods (Elvira and Friederike) in May and June, which caused overall insured losses of EUR 2.7 billion (USD 3 billion). Underwriting results remained stable in Switzerland and were slightly worse in Italy, mainly driven by weaker but still profitable motor business. The earthquakes in Italy in August and October are expected to have only a minimal impact on 2016 underwriting profitability due to low insurance penetration. Other markets like the UK, the Nordic countries and Spain experienced some improvement, mainly based on motor. Underwriting results in Japan and Australia, the largest mature markets in Asia Pacific, have been mixed. In Japan, overall underwriting results deteriorated, reflecting mainly higher natural catastrophes due to the Kumamoto earthquake and higher losses in auto insurance. Underwriting performance in Australia improved. By line of business, deteriorating liability and motor segment results were offset by improvements in property risk (homeowners, fire and industrial special risks). Investment returns for primary non-life insurers remain under pressure as average yields are stalling and operating cash flows are weak.

The global economic outlook for 2017 and 2018 is for moderate growth. With respect to primary non-life insurance, the emerging markets will be the main driver with an estimated strong improvement to 6%–7% premium growth in real terms expected in 2017 and 2018. Real growth in advanced markets is expected to slow slightly next year since macroeconomic conditions will improve only modestly.

Bangladesh Insurance Market

Bangladesh is a small country and its non life insurance market is small comparing other developing but 45 non life insurance companies are function in the Bangladesh. The Insurance Act is updated recently but still insurance rules not updated. As a result insurance companies are working based on 1958 Rules. The number has been increased largely over the last few years; most of the insurance companies are still struggling. The future expansion of Bangladesh insurance market and increase of insurance penetration in the country lies in tapping the hitherto untapped segments of the market - personal lines business in particular which has remained neglected so far. The growth of the country's economy, in line with the growth in south Asian countries will also provide an impetus to the insurance sector by creating new business opportunities. However, this requires sustained efforts by the insurance industry as a whole, apart from individual insurers introducing new products and improving their services.

Non-life Insurance premium growth was better in 2016 than in 2015 & 2014, in both the advanced and emerging markets of the world whereas in the last few years the Bangladesh insurance industry has maintain growth although a down-ward trend in the year 2014 because of poor investment. The experts have the fear of that the industry was likely to have the similar experience in 2015.

The growth of non-life insurance premium income in 2015 was 7.94 percent which was 6.21 percentages in 2014. The combined premium income underwritten by public and private sectors stood at Tk. 26,381 million in 2015. GDP growth in Bangladesh has been hovering more than 6 per cent during the last few years. Although the insurance industry growth have been double digit during the years 2009 to 2012, though this somewhat slowed down during the last three years. The comparative premium position during the last seven years has been as follows:

Growth of Non-life Insurance Premium of the Bangladesh

Amount in Million Taka

Growth of Non-life Insurance Premium of the Bangladesh

Year	Non-life insurance	Increased	Growth (%)
2009	13,898	1,045	8.13
2010	16,544	2,646	19.04
2011	19,249	2,705	16.35
2012	21,452	2,203	11.44
2013	22,947	1,495	6.97
2014	24,440	1,493	6.21
2015	26,381	1,941	7.94

Insurance Premium growth depends on economical or business growth of the country. Actually the year 2016 was very tough considering all other aspect. Due to tough competition unethical practice is looking in the insurance companies. The procurement cost has been increased as a result insurance companies fail to provide best service to the insurer. We believe 2017 will be more positive for non life insurance business of the Bangladesh and we will overcome all difficulties.

COMPANY'S BUSINESS ACTIVITIES AND OPERATING PERFORMANCE REVIEW

Gross Premium

Private sector investment was increasing very slowly, on the other hand GDP also increasing. Domestic insurance also grow almost 8% and our company also doing good business during the year 2016. Although globally the Bangladesh also faces some other challenges to overcome the global crises. To overcome all varies, the Govt has been trying to maintain the improvement in all sectors of the economy of Bangladesh specially import, export & investment in industrialization. We know that general insurance business depends on Import, Export, investment in industrialization, and coverage of the security of all kinds of assets. We know that a large number of insurance companies in Bangladesh at present are certainly not commensurate with the size of the market that has led to aggressive competition which has, determine to the industry as a whole.

Considering all difficulties, the wise management team of the company has taken proper attention in time with professional manner and due to this attention the gross premium of the Company has been increased significantly. In the year 2016, the Company was able to post a significant business growth in comparison to the insurance industry. The gross premium is at Tk. 65,21,77,275/- as compared to Tk. 64,46,73,914/- in 2015.

to enter into retail segments. The Company continues to invest in knowledge based products and in training of its manpower to keep itself competitive and responsive to fast changing environment

Non life insurance claims represent the claims due under contracts in respect of non-life insurance; that is, the amounts which insurance enterprises are obliged to pay in settlement of injuries or damage suffered by persons or goods (including fixed capital goods). Non-life insurance claims are recorded at the time of the accident or other event insured against occurs. The settlement of a non-life insurance claim is treated as a transfer to the claimant. Claims incurred in insurance related activities consist of claims and claims handling expenses paid during the year together with the movement in outstanding claims.

The settlement time for claims depends on various factors such as the line of business, cause of loss, the nature of claim etc. Typically, claims which result in total or partial destruction of assets or records (such as those caused by Acts of God), those where adequate documentation to establish the claims are awaited and those which are the subject matter of judicial processes tend to have longer settlement times, which are beyond the control of the Company. The Company has improved internal processes, for further reduction of average claims settlement time and claims outstanding.

The overall claims expense was Tk.8,16,09,809/- during the period ended December 31st 2016 whereas Tk.9,42,53,838/- during the period ended December 31st 2015. In essence, the exact structure of Corporate Governance has determined the responsibilities and rights of the Board and the Management.

The Bangladesh Securities and Exchange Commission have issued certain further conditions, on 'comply' basis, in order to enhance corporate governance for the interest of investors and the capital market vide the Notification No.SEC/CMRRCD/2006-158/134/Admin/44 dated 07 August 2012. The Board of Directors already advised the management to implement the instruction as per guidelines and the latest position of the compliances of the corporate governance structure and guidelines of the company are presented in the annual report 2016 for the information of the Shareholders and other stakeholders.

Phoenix Insurance Co. Ltd. has continued this practices on good corporate governance at all levels. The Board is a policy and decision-making body for all issues and implements the decision with the support of Management. The main compulsion is evidence by the following practices:

- 1) The number of Directors in the Board is 17(saventeen) who are experience in the management, law and business.
- 2) According to the Insurance Act and Corporate Guidelines of BSEC the Board Members set the Board of Directors team appropriately.
- 3) Board of Directors and Management of the Company is independent body.
- 4) The position of the Chairman of the Board and the Managing Director of the company are different individuals.

- 5) The Company has different Committee like as Services Committee, Claims Committee and Audit Committee to support the Board for taking decision on various important operational matters.
- 6) An Audit committee was formed by 7 (seven) members of the Board of Directors of the Company.
- 7) The Management operates within the policies, rules and delegations approved by the Board and compliance with other regulatory requirements.
- 8) The Company put priority in submitting regularly periodical statements to Insurance Development & Regularity Authority and other regulatory bodies in time to enable the shareholder to make correct assessment of the Company's affairs and profitability.
- 9) The Board also ensures the compliance of requirements of regulatory bodies such as Bangladesh Securities and Exchange Commission and Registrar of Joint Stock Companies and Firms.
- 10) The Board is responsible for establishing an adequate and effective internal control system in the Company. Management monitors its internal control policies and develops the policies whenever it feels necessary.

Information Technology

Information Technology usually plays a vital role in every business sector. The Financial sector especially Insurance industry depends largely on computer system to provide the highest level of customer service. To face the challenges springing from growing competition and increasing customer longing, Phoenix Insurance has adopted latest technology to develop more flexible structure that can respond quickly to the dynamics of a fast changing market scenario.

Recently we have introduced Software for Reinsurance Department. This is highly sophisticated and integrated software which enable the department to work quickly and smoothly. Most of the branches of the company are working under one network to facilitate services to the customer. As a result, customers are privileged to avail the advantage of insurance facilities.

Our dynamic, skilled and energetic IT personnel, the IT division is on continuous effort to ensure up and running of IT infrastructure, well equipped with high end server and cisco router and most sophisticated oracle database and application server.

Risk Mitigation

Underwriting risk includes the risks of inappropriate underwriting which includes inadequate pricing, inappropriate terms and conditions and ineffective physical risk management. To manage this risk, the Company pays particular attention to the underwriting controls and risk surveys.

The underwriting heads of Head Office and each branch are responsible for managing and controlling the underwriting operations under their respective domains. Underwriting is conducted in accordance with a number of technical controlling protocols. This includes defined underwriting authorities, guidelines by class of business, rate monitoring, underwriting peer reviews and practice for seeking guidance on large and intricate risks from REG (Risk Exposure Group). This Group is represented by the department head of Underwriting, Claims, Reinsurance, Branch Control and Accounts. The Company monitors the risk of accumulation arising from

for catastrophic events. The exposure is protected by a comprehensive reinsurance program that has the capacity to respond to different possible catastrophic events.

The Company also has a separate Physical Risk inspection department which carries out a large number of high risk, large & medium risks surveys before underwriting them. The surveys are conducted both on set schedules and on case to case basis. The department by far carries out the largest number of surveys in the market and provides an insight of the risk to the underwriters thus assisting them in making right decisions

Issuance of Insurance & Reinsurance document risk and its management:

To protect the day-to-day operational risk of the Company, the management takes special care about the following areas:

- 1) Issuance of Insurance and Reinsurance policy documentation;
- 2) Coordination of Premium Collection;
- 3) Preparation of Reinsurance/Bordereaux;
- 4) Administration of Claims with payments as well as recoveries;
- 5) Run-off Administration and Related Services;

Environment RELATED INITIATIVES

It is observed that in recent years, there has been a growing concern for various environmental issues. These issues force people to reevaluate their interests in a number of wide-ranging and complex areas, thus increasing the role that Organizations must play in addressing these issues. Of these issues, we strongly believe that addressing the need to preserve and restore the natural environment is of particular importance for corporations. Therefore, Phoenix Insurance will continue to exercise our corporate philosophy by promoting environmental preservation and working to be a good corporate citizen with the aim of creating a good society that is full of healthy, smiling faces.

Phoenix Insurance tried to stimulate awareness for the protection of environment by personalizing environmental issues and to enable everyone to realize not only our responsibilities, but also our power to become agents for change in support of sustainable and equitable development by ensuring a cleaner, greener and brighter outlook for ourselves and for the next generations.

Phoenix Insurance focuses on the following actions along with supporting innovative conservation initiatives and inspiring our associates and guests to support these efforts:

Environmental and social obligations

We strongly believe, social responsibility is an ethical framework and suggests that an entity, be it an organization or individual, has an obligation to act for the benefit of society at large. Social responsibility is a duty every individual has to perform so as to maintain a balance between the economy and the ecosystems. A trade-off may exist between economic development, in the material sense, and the welfare of the society and environment, though this has been challenged by many reports over the past decade. Social responsibility means sustaining the equilibrium between the two. It pertains not only to business organizations but also to everyone, who's any action impacts the environment. This responsibility can be passive, by avoiding engaging in socially harmful acts, or active, by performing activities that directly advance social goals.

Every business entity has an impact on the environment and there arises legal obligations which it must fulfill. The requirements are relatively simple for business such as offices. Meeting the environmental obligations is not just a legal requirement. It is worthwhile in itself, and helps minimize the likelihood of any environmental problems, costs and damage of the business. Taking a responsible approach to the environment can also reduce the costs of unnecessary waste, strengthen the Company image and help us to win business from less reputable competitors.

Minimize energy and water use within our premises and processes in order to conserve supplies and minimize the consumption of natural resources.

- Purchase preferable products, and services for all our daily operational needs that do the least damage to the environment.
- Conserve natural resources by adopting pollution preventive practices.
- Extending the life of equipments through preventive maintenance scheduling, purchasing and reworking used equipments etc.
- Documents management project initiative to archive the backlog and day to day official documents which generates through daily operations and facilities express search capability for achieved materials using enadoc system.
- Remotely thirty one branches will be connected with systems and documents scanning, indexing, export of scanned images to the enadoc system will be done through from one of the location in a centralized environment.
- Practices reusing, recycling and reprocessing materials that would otherwise be discarded as waste.

Integrated Reporting

An integrated report is a concise communication about how an organization's strategy, governance, performance and prospects lead to the creation of value over the short, medium and long term.

Integrated reporting means the integrated representation of a company's performance in terms of both financial and other value relevant information. Integrated reporting provides greater context for performance data, clarifies how value relevant information fits into a business, and may help implant long truism into company decision making. While the communications that result from integrated reporting will be of benefit to arrange of stakeholders, they are principally aimed at providers of financial capital allocation decisions.

1. **Strategy:** Strategy is the direction and scope of an organization over the long-term, which achieves advantage for the organization through its configuration of resources within a challenging environment, to meet the needs of markets and to fulfill stakeholder expectations.
2. **Governance:** Governance or more precisely corporate governance essentially involves balancing the interests of the many stakeholders in a company; these include its shareholders, management, customers, suppliers, financiers, government and the community.
3. **Performance:** Business performance is the accomplishment of a given task measured against preset known standards of accuracy, completeness, cost and speed. In a contract, performance is deemed to be the fulfillment of an obligation, in a manner that releases the performer from all liabilities under the contract.
4. **Prospects:** Potential customer or client qualified on the basis of his or her buying authority, financial capacity and willingness to buy.

Integrated reporting creates value in the Long Term

The world has changed from the end of the Second World War to the fall of the Berlin wall, we were told the tale of a stable economic and political landscape. The paradoxical complexity is that all public companies are already required to publish a financial report and an increasing number of companies are now publishing a corporate social responsibility report or sustainability report on their environmental, social and governance performance. But still, stakeholders feel they do not have the right level of information and are often lost in the cumbersome reports produced.

This is where the notion of integrated reporting comes into play. As the international integrated reporting council defines it as a process founded on integrated thinking, that result in a periodic integrated report by an organization about value creation over time and related communications regarding aspects of value creation. An integrated report is a concise communication about how an organization's strategy, governance, performance and prospects, in the context of its external environment, lead to the creation of value in the short, medium and long term.

Integrated reporting creates value through risk management

The clear advantage of integrated thinking is about risk management and the focus on material aspects. As the CEO of a large international company told, "Focusing our communication on topics that impact our financials in the long term, does not mean that we do not manage our short-term risks. But in our industry, the value creation cycle is at least of 5 years; we need a shift in investors' relations and to generate insights on the middle –long term financial performance."

Integrated reporting increases competitiveness

The capital used by an organization is embodied in the value that it created through its business model. A sustainable society requires that all of its businesses be pursuing sustainable strategies which are based on a long-term focus in value creation for shareholders and all other

stakeholders. Indeed, with new factors such as the development of unrestrained social networks, separating financial performance and corporate responsibility is ineffective. With over 75% of their market value relying on intangible assets, many companies are discovering that very good business opportunities can rely on the efficient use of social and human capital.

Integrated reporting changes management practices

Among those in charge of the governance, roles and issue are strongly impacted. After having stressed the organizations by learning processes and relationships, their next challenges are to build a common vision and give sense to all stakeholders. The point of view of Paul Drachmann (IIRC CEO); "Without HR involved in the strategy and value chain of a business, integrated reporting will show a weakness in the organization."

Integrated reporting is embryonic and evolving

Two main challenges need to be tackled when you are willing to publish integrated report. First, integrated reporting requires integrated vision, roadmap, processes and tools: the alignment of the organization on a strategy that reflects environmental, social and governance-related (ESG) risks and opportunities while emphasizing financial, environmental and social sustainability is crucial. To support this, transversal systems enabling real-time flow of information and resources are needed.

Second, integrating sustainability data raises the credibility of the reported data since it is now part of regulatory filings that are scrutinized by regulators and to a greater extent by auditors. Internal audit may play an assurance role for nonfinancial metrics. The

impetus for this move is to provide a clearer narrative around how sustainability measures provide or secure longer-term financial return.

Phoenix insurance company's involvement in integrated reporting

Those who are in-charge of looking after the governance of Phoenix insurance Company Ltd i.e., the Audit committee a sub-Committee of the Board of Directors ensures its integrity in performing overall responsibility in the company ensuring a proper and stable internal control system through the performance of internal audit periodically and also as and when required basis. The audit committee also considers the external auditors' findings and gives highest importance to those and takes appropriate measures for further development and assurance of the internal control systems of the company.

The most exciting about integrated reporting is that, this is not just a cosmetic change in communication, but a deep behavioral evolution in the way all stakeholders assess value of a company and its ecosystem. And this will unquestionably lead to value creation.

CLAIMS MANAGEMENT

Phoenix Insurance believes that prompt settlement of insurance claims is the best way to earn confidence of the insuring community. Phoenix has been giving top priority for settlement of the insurance claims in due course. Phoenix always stands beside the Insured in the event of any loss of their properties. Consequently we have been able to create cemented relationship with the valued client's over the last 30 years of operation. As a part of best client services, the responsible officer rushes to the place of reported loss along with the reputed surveyor as soon as receive the intimation of the loss.

In special cases, the top executives are paying visit the place of incident to ease and relax the clients at the moment. Even in case of big losses, Phoenix Insurance also tries to make advance payment before official approval of a claim to enable the insured for resuming business operation very shortly.

To meet up the claim promptly there is a Claim Committee working in the company attentively. This committee devises the claims settling policy of the Company. It oversees the claims position of the Company and ensures that adequate claims reserves are made. Particular attention is paid to significant claims cases or events, which give rise to a series of claims. The Claims Settlement Committee determines the circumstances under which the claims dispute to be brought to its attention and decides how to deal with such claims disputes. It also oversees the implementation of the measures for combating fraudulent claims cases.

In the year 2016, Phoenix Insurance has settled a gross amount of claim at Tk. 8,16,09,809/- only where as in the last year it was Tk. 9,42,53,838/- only.

Audit Report of the Accounts of 2016

Auditors' Report

To the shareholders of Phoenix Insurance Company Limited

We have audited the accompanying financial statements of Phoenix Insurance Company Limited which comprise of Financial Position (Balance Sheet) as at 31st December, 2016 and the related Fire, Marine Cargo, Marine Hull, Motor and Miscellaneous Insurance Revenue Accounts as well as Statement of Profit & Loss and other Comprehensive Income, Profit and Loss Appropriation Account, Statement of Cash Flow, Statement of Changes in Equity and Notes for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements:

The company's management is responsible for the preparation and fair presentation of these financial statements in accordance with Bangladesh Accounting Standard (BAS)/Bangladesh Financial Reporting Standards (BFRS), the companies Act 1994, Bangladesh Securities Exchanges Commission Rules 1987 and other applicable laws and regulation and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Bangladesh Standards on Auditing (BSA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance where the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments the auditor consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluation the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. .

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements prepared in accordance with Bangladesh Financial Reporting Standards (BFRS), give a true and fair view of the state of the company's affairs as of 31st December, 2016 and of the results of its operations and its cash flows for the period then ended and comply with the Companies Act 1994, the Insurance Act, 2010, Insurance Rules 1958, relevant schedule of Bangladesh Securities Exchanges Commission Rules 1987 and other applicable laws and regulations.

We also Report that

- a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit and made due verification thereof;
- b) In our opinion, proper books of accounts as required by law have been kept by the company so far as it appeared from our examination of those books ;
- c) The Company's Statement of Financial Position and revenue accounts and its cash flows dealt with by the report are in agreement with the books of account and returns;
- d) The expenditures incurred and payments made were for the purpose of the company's business;
- e) As per Section 63(2) of the Insurance Act – 2010 as amended, we certify that to the best of our knowledge and belief and according to the information and explanation given to us, all expenses of management wherever incurred directly or indirectly with respect to insurance business of the company transacted in Bangladesh during the year under report have been duly debited to the related revenue accounts and the profit and loss accounts of the company and
- f) As per regulation 11 of Part 1 of the third schedule of Insurance Act 1938 as amended, we certify that to the best of our information and as shown by its books, the company during the year under report has not paid any person any commission in any form outside Bangladesh in respect of any of its business re-issued abroad.
