GLOBAL ECONOMY AND INSURANCE GROWTH

WORLD ECONOMY

World economy was faced with tremendous pressure on COVID-19 crises. Trade & finance was reduced as a result economic growth was down. The Russia-Ukraine war has raised the world tension furthermore. Actually, geopolitics is fundamental to macroeconomics, and trade has historically been weaponized amidst high geopolitical tension. The Russia-Ukraine war led to trade sanctions, a food crisis, and energy shortages around the world as borders shut and the flow of goods halted. Similarly, the US-China trade war resulted in harmful tariffs and global instability.

In peacetime, trade is an expression of the trust across national borders, formed through collaboration and mutually beneficial agreements that bring certainty and stability to international relations. The rules-based multilateral trading system serves to minimize risk and volatility through shared principles, frameworks for dispute settlement, and mechanisms to ensure healthy competition.

However, turbulence in geopolitics rattles this foundation, disrupts trade, and in some instances, cascades into protectionism and civil unrest.

While the global economy was recovering strongly from the COVID-19 pandemic, the war in Ukraine posed a setback to the ongoing recovery. A rise in the global commodity prices and sluggish economic activities by war induced supply chain disruption is being observed.

International organisations revised their forecasts for economic growth prospects and inflations. As per the United Nations (UN) publication 'World Economic Situation and Prospect 2022', the global economy grew by 5.5 percent in 2021, the highest growth rate since 1976, after contracting 3.4 percent in 2020. Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia's war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

WORLD INSURANCE GROWTH

The global insurance market grew from \$5946.74 billion in 2022 to \$6466.23 billion in 2023 at a compound annual growth rate (CAGR) of 8.7%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, causing inflation across goods and services and affecting many markets across the globe. The insurance market is expected to grow to \$8603.8 billion within next 3-4 years at a CAGR of 7.4%.

The country's insurance sector has taken a hit from the ongoing global economic slowdown caused by the Covid-19 pandemic and exacerbated by the Russia-Ukraine war.

BANGLADESH ECONOMY AND INSURANCE BUSINESS

Bangladesh Economy

In recent years, Bangladesh has emerged as one of the fastest-growing economies in the world. The country's economy is driven by several key sectors, including textiles and garments, agriculture, and manufacturing.

Bangladesh also faces significant challenges, including poverty, political instability, and infrastructure deficiencies. In addition, the COVID-19 pandemic and finally Russia-Ukraine war has had a significant impact on the country's economy, with reduced demand for its key exports and disruptions to supply chains.

Bangladesh economy was growing consistently high over a decade crossing 7.0 percent milestone in FY 2015-16 and 8.0 percent milestone in FY 2018-19. However, the COVID-19 pandemic reduced the growth rate to 3.45 percent in FY 2019-20. The economy grew by 6.94 percent in FY 2020-21. According to the provisional estimates of BBS, the GDP growth stood at 7.25 percent in FY 2021-22, 0.05 percentage point higher than the target rate and 0.31 percentage point higher than the previous fiscal year.

Looking ahead, Bangladesh is expected to continue its strong economic growth, although the pace of growth may be impacted by ongoing challenges and external factors. The government has outlined a number of economic development plans and initiatives, including investment in infrastructure and human capital, to support continued growth and development in the coming years.

Although global trade has turned around in 2021 after the effects of COVID-19 pandemic, the Russia-Ukraine conflict has been showing significant negative impact on world trade. As a result, food supply chains have been disrupted and Western sanctions on Russia have led to global trade instability. At the same time, the prices of petroleum along with commodity prices are rising, which is also creating inflationary pressures on the economies. However, Bangladesh's export growth is on a positive trend. During July-April of FY 2021-22, total export earnings increased by 35.14 percent to US\$ 43,344.34 million compared to the same period of previous fiscal year. The total import payments (c&f) stood at US\$ 66,898.70 million in FY 2021-22 (July-March), which is 43.84 percent higher than the import payments of the same period of the preceding fiscal year. The deficit of trade balance widened and stood at US\$ 22,306 million in FY 2021-22 (July-February) which was US\$ 12,359 million in FY 2020-21 (July-February). This deficit mainly occurred by the high growth in import payments relative to the growth in export earnings.

Bangladesh Insurance

Bangladesh's insurance sector has been growing steadily over the past few years, with non-life insurance being a major contributor. In 2022, the non-life insurance sector in Bangladesh continued to show significant growth, driven by an increase in awareness among individuals and businesses about the importance of risk mitigation.

In 2022, the non-life insurance business in Bangladesh grew at a steady pace, driven by an increase in demand for insurance products. According to data from the Insurance Development and Regulatory Authority (IDRA), the non-life insurance market in Bangladesh was worth BDT 41.47 billion in 2021. It is expected to grow by 30% in 2022 and reach BDT 54.13 billion.

	Amount in crore				
Year	2018	2019	2020	2021	2022
Premium	3,394	3,790	3,743	4,147	5,413
% (+/-)	14%	12%	(1.24%)	11%	30%

(Figure was collected from IDRA publication and information of 2022 was unaudited)

There are currently 45 non-life insurance companies operating in Bangladesh, with the top 10 companies accounting for over 70% of the market share. The companies have been able to maintain their dominant positions in the market by offering innovative insurance products and providing excellent customer service. One of the major trends in the non-life insurance business in Bangladesh is the shift towards digitalization. Insurance companies are increasingly adopting digital technologies to improve their operational efficiency and enhance customer experience. This includes the use of mobile apps for policy purchases and claims processing, online customer portals, and chatbots for customer support. Insurance companies are developing new insurance products that cater to the evolving needs of their customers. For example, there has been a growing demand for insurance products that cover cyber risks, given the increasing threat of cyber-attacks.

Despite the growth and potential of the non-life insurance business in Bangladesh, there are several challenges that the sector faces. One of the major challenges is the low penetration rate of insurance in the country. According to IDRA, the insurance penetration rate in Bangladesh is only 0.6%, which is significantly lower than the average for other countries in the region. Another challenge is the lack of awareness among individuals and businesses about the importance of insurance. Many people in Bangladesh do not see insurance as a priority, which makes it difficult for insurance companies to reach out to potential customers.

Overall, the non-life insurance business in Bangladesh has been showing steady growth in recent years, and there is a favorable regulatory and business environment for insurers to continue to expand their operations. The sector needs to continue its focus on digitalization and product innovation, while also increasing its efforts to educate the public about the benefits of insurance. The government has also taken several initiatives to promote the insurance sector, such as introducing mandatory insurance requirements for certain sectors, including agriculture and export industries.

COMPANY'S BUSINESS ACTIVITIES AND OPERATING PERFORMANCE REVIEW

BUSINESS RISKS AND SYSTEM OF INTERNAL CONTROL

We know that the insurance business is taking the risk and Phoenix Insurance business is also exposed to diverse risks that arise both on internal and external fronts. And because there is always a degree of uncertainty in our operations, the Board of Directors assures its shareholders that the Company has a competent risk management process to ensure that the system of internal control is sound in design and has been effectively implemented and monitored. Although it is possible that all risks to the business are unknown at present, the Company takes reasonable steps to identify all material and financial risks that may hamper business results. The Company then systematically reviews those risks, considering the changing internal and external environment to assess whether the controls that are in place are adequate to address those risks that are likely to hit the Company's business activities, operations, liquidity, and financial position for future performance.

Looking ahead, in view of the pandemic uncertainties and various other challenges, Phoenix may also adjust its business strategies in the future to adapt to the global realities. The details are presented in the Annual Report page no 110 to 122 of the internal control and Risk management topics discussion.

Business strategy

Gross domestic product (GDP) growth of Bangladesh economy is very lucrative last couple of years due to agriculture sector contribute much more comparing previous period. At the same time industrialization growth is increasing in the private sector. Domestic insurance also grows almost 6%-8% but government sector insurance business growth has increased significantly. But COVID crises have changed the track of the insurance business philosophy. We know that non-life business depends on Import, Export, investment in industrialization and coverage of the security of all kinds of assets. The large number of insurance companies in Bangladesh at present are certainly not commensurate with the size of the market that has led to aggressive competition which has determined to the industry as a whole. The Company focuses on small and non-traditional business and there are huge scopes to enlarge insurance coverage which have the possibility to earn insurance business. In this connection the management has prepared some guidelines to do more business on non-traditional business in addition to regular business.

Business Position

In February 2022 Ukraine-Russia war started and immediately USA, Europe and UN sanctions in Russia. The trade has become slow and a latter foreign currency shortage was found and the government has restricted to open LC. Insurance industry face tremendous pressure to collect business but the management of the company has taken proper attention in time with professional manner and due to this attention, we protect our business although some textile-based industry was not operated for why we lost some gross premium of the Company. In the year 2022 the Company has maintained business growth in comparison to the insurance industry. The gross premium is at Tk.68,38,58,673/- as compared to Tk. 670,932,040/- in 2021.

Last five years an underwritten insurance business of the company is presented below:

Strategy and priorities

Through our industry-leading Claims Commitment we aim to keep it simple and tailor our approach to our customers' needs and preferences. Working with our customers and agents our claims professionals promptly investigate, evaluate and develop an appropriate resolution strategy. Where we have a duty to defend, we will work to determine as early as possible our customer's preferred approach to whether the claim should be settled or defended. In the event of an insured first-party property loss we help our insured's get back to business quicker by making settlement of claims in early times.

Being there when our customer needs us is a top priority. We value a personal connection and are committed to:

- a) Contacting our client or their representative within one business day of receiving a loss notification when we lead the primary claim.
- b) Returning phone calls and emails within one business day. When out of the office we provide additional contacts should immediate assistance be needed?
- c) Completing initial investigations on claims immediately.
- d) Paying covered claims within a period framed in the policy/Insurance Act subject to complete all requirements of settlement.

The settlement time for claims depends on various factors such as the line of business, cause of loss, the nature of claim etc. Typically claims which result in total or partial destruction of assets or records (such as those caused by Acts of God) those where adequate documentation to establish the claims are awaited and those which are the subject matter of judicial processes tend to have longer settlement times which are beyond the control of the Company. The Company has improved internal processes for further reduction of average claims settlement time and claims outstanding.

We believe that a claim handle is more important to complete the outcome of its loss and our clients and agents tell us that they feel a difference from other companies regarding settlement of claims in early times with satisfaction of the clients. Actually, we depend on our service and service is only for customers in their tough times.

Claims Settlement

The overall claims expense was Tk. 133,513,130 during the period ended December 31st 2022 whereas Tk. 244,378,632 during the period ended December 31st 2021. Phoenix Insurance Company has always committed to settle the Insurance Claims appropriately in time. We believe that our commitment is to the satisfaction of our customer and their satisfactions are the goodwill of our Company's. The year wise insurance claims paid are enumerated below:

Approach

Reinsurance department is the key and the most important department in any general insurance company. Reinsurance arrangements with professionally structured dependable and financially sound reinsurers are absolutely essential. The role and strong support of reinsurers for the company is vital. Reinsurance department is to ensure that first class reinsurance arrangements at minimum costs are available both locally and abroad to the Company. Professional support and comprehensive reinsurance arrangements reduce the risks of insurance companies in respect of claims incurred or expected to be incurred. PICL has always been successful to have support of world known financially and professionally supported first class and excellent reinsurers in the past as well as in the current financial year.

Our Reinsurance unit strategy remains focused on differentiation and profitable growth through allocation of capital to both existing and new risk pools. The significant global protection gap which exists today in both lines of business is expected to continue to widen and will also contribute significantly to creating new risk pools in the future. As a result, we expect to see further business opportunities particularly in high-growth property markets. During the year 2022 we don't face any catastrophic loss and our country also safe from this type of economic loss.

Client's Satisfaction

We differentiate ourselves by understanding the specific needs of our clients. Client segmentation is a foundational element of our differentiation approach and is built on a deep understanding of our clients facilitating delivery of tailored offerings. We interact with clients across all levels and functions enabling strategic discussions between the right people at the right time. This dedicated delivery model — serving global and national clients continues to be effective.

Clients are always looking for solutions to solve their business challenges. In parallel with our engagement approach, we have established teams to manage our clients' needs which expand on traditional reinsurance with our knowledge of risk bearing capacity and innovation. Taken together such tailored transactions and solutions help clients to sustainably grow their business.

History and Allocation

Phoenix Insurance Co. Ltd. has arranged sufficient protection through the re-insurance program with state own organization Sadharan Bima Corporation. As the company's portfolio growing fast the reinsurance department feels to re-organize the re-insurance program for the security and safety of the company. The Company had started placement of the re-insurance program connecting with the Overseas Market. From 2010 the company maintaining the government rules and placed the 50% share to the overseas secured Market in the major share to the A-rated re-insurance companies and the rest 50% with Sadharan Bima Corporation. The company also changed their re-insurance structure and obtained both Proportional and Non-proportional treaties with higher capacity to protect the interest of the multinational company whose total risk is a bigger size. The company also obtained Catastrophe Excess Loss Treaty in Fire business to safeguard the company as well as the shareholders interest to protect any disaster. Our key value drivers are large capacity technical expertise and the ability to develop tailored solutions to meet clients' needs for example in the area of solvency relief.

The allocation of the company's re-insurance arrangement is as follows:

- | | | |
|---|---|-----------|
| i) Sadharan Bima Corporation (SBC) Bangladesh | - | 50% share |
| ii) National Insurance Co. Ltd. India | - | 30% share |
| iii) GIC Bhutan | - | 11% Share |
| iv) CICA Africa | - | 9% Share |

The company has also placed facultative re-insurance protection in excess of company's treaty capacity to other markets such as Sen Re Senegal Asian Allco American. The company has also placed Marine Cargo facultative business to various Lloyd's syndicate and has also connection with Munich Re Germany Swiss Re Singapore and Zurich. The Board of Directors is always aware about the customer's insurance risk and ensures the protection of its liability by sufficient and timely re-insurance arrangement.

The Company follows a policy of optimizing retention of risk through a carefully designed high quality program of re-insurance with "A" rated and well reputed re-insurers. The focus of reinsurance treaty program has been designated to protect the value of risk by ensuring timely and quality protection for individual risks and in catastrophic events. Your Company follows a high-quality low risk reinsurance strategy. Your Company's conventional reinsurance policy reduces the potential volatility of the earnings stream. Reinsurance arrangements in place include surplus Excess of loss and catastrophe coverage. The effect of such reinsurance arrangement is that the Company should not suffer total net insurance losses beyond the Company's risk appetite in any one year.

LIQUIDITY MANAGEMENT

Liquidity policy

Our core liquidity policy is to retain sufficient liquidity in the form of unencumbered liquid assets and cash to meet potential funding requirements arising from a range of possible stress events. To allow for regulatory restrictions on intra-Group funding liquidity is managed within groups of entities known as liquidity pools. To manage the risks, we have a range of liquidity policies and measures in place. In particular we aim to ensure that:

- Sufficient liquidity is held to meet funding requirements under current conditions as well as adverse circumstances;
- Funding is maintained and credited at an appropriate market rate through our internal transfer pricing;
- Diversified sources are used to meet our residual funding needs;
- Long-term liquidity needs are taken into account both in our planning process and in our management of financial market risk.

Liquidity Position

The Company's primary source of funds is cash provided by operating activities including premiums and net investment income. These funds are used primarily to pay claims, commissions, operating expenses and shareholder dividends. Cash flows generated from operating activities are generally invested to support future payment requirements including the payment of dividends to shareholders.

The Company's liquidity is in a steady position by controlling operating expenses. The total cash and cash equivalents as at the end of 2022 are Tk. 511,515,041 against Tk. 528,066,934 in 2021.

The Company prudently manages liquidity to ensure its ability to meet contractual obligations as and when they fall due.

RESERVE FUND

To protect the risk factors of the company it is very essential to have a good amount of reserve fund for the Company. The Insurance Act and Income tax ordinance also recommended to build up the reserve fund for the company accordingly the company separated the following reserve funds to protect the risk of the Company's.

INVESTMENT

Strategy

Insurance is a form of risk management primarily used to hedge against the risk of a contingent or an uncertain loss. To meet up the uncertain loss the Company keeps the amount in the form of investment. On the other hand, good investment is also main tool of the company's profit.

PHOENIX Insurance's investment portfolio maintained its track record of sustainable performance results with another strong contribution in 2022. All asset classes contributed to the result reflecting the diversification of investment income sources as well as the quality of the investment portfolio. During 2022 Phoenix Insurance increased its overall allocation to bonds and Fixed Deposit to Bank enhancing income with low-duration risk. The allocation to equities and alternative investments remained relatively stable. While the investment portfolio is well-positioned overall the company maintains suitable flexibility should it be presented with attractive market opportunities or a change in the investment outlook.

Investment Portfolio

Phoenix Insurance Company Ltd. earns investment profits at large scale and the Board fixed a target to enlarge the investment figure of the company to increase the investment income. Our expectation is to earn more profit from the Company's investment amount. For the greater interest of the Company and also the interest of shareholders we utilized the maximum fund and, in this connection, we have invested our amount in the form of Shares. Strategy

Insurance is a knowledge based technical profession and we take the risk of a couple of thousand crore taka. The assessment and management of the risk is to manage by way of prudent underwriting. The proper claim settlement is also based on prudent underwriting. The Company has now been able to underwrite any value of sum insured by charging the most economic and competitive Premium rate ensuring maximum security at minimum cost within the framework of existing tariff and high capacity of Re-insurance treaty made with 'A' rated overseas Re-insurers. It has become possible for the equipped technically qualified and experienced management personnel. We have been trying to remain with the Insuring community in the time of need for the last two decades since inceptions.

The Management is working to improvement (at least in the near future) in level of economic and business activities in the country and our strategy will therefore continue to emphasize on -

- a) Customer-driven business focus;
- b) Financial and investment strategy based on further strengthening the balance sheet;
- c) Conservative and sound risk management; and Operational agility by maintaining quality leadership.

Comparative Result

You know that underwriting profit is only the profit exactly earned from the insurance business only. It consists of the earned premium remaining after losses have been paid and administrative expenses have been deducted. It does not include any investment income. Phoenix Insurance Company Ltd. underwrites the business premium on the basis of insurance principles and code of business. We issue our underwriting documents for the interest of the customer's requirements after analysis the risk of the insurable items accordingly insurance premium charge on the basis of the insurance contract. The profit of the insurance product calculated separately on the basis of the Insurance Act. Previous five years underwriting profit presented in the below:

FUTURE ATTITUDE

Speedy business growth in the insurance industry at the beginning of the year 2023 simultaneously the Phoenix Insurance also started excellent at the opening of this year, but Ukraine-Russia war hit the world trade and business and day by day premium earning is going down.

However, we are very optimistic to overcome the adverse situation and rebuild our business position and show a presentable position business at the end of the year 2023.
